SHIRLEY TEMPLE

SHIRLEY TEMPLE (Pruitt). A new seedling that stole the whole show in Oregon the past summer. Named for America's little sweetheart. Color, cream, with darker throat. A color combination greatly needed in the large flowering type. Individual florets are over six inches in width, of which there are six to seven open at a time. Nicely ruffled. Plant and foliage are vigorous, similar to Picardy, one of its parents. The bulbs also resemble those of Picardy. A splendid grower and good germinator. Large bulbs, \$10.00 each.

EARLY PEACH

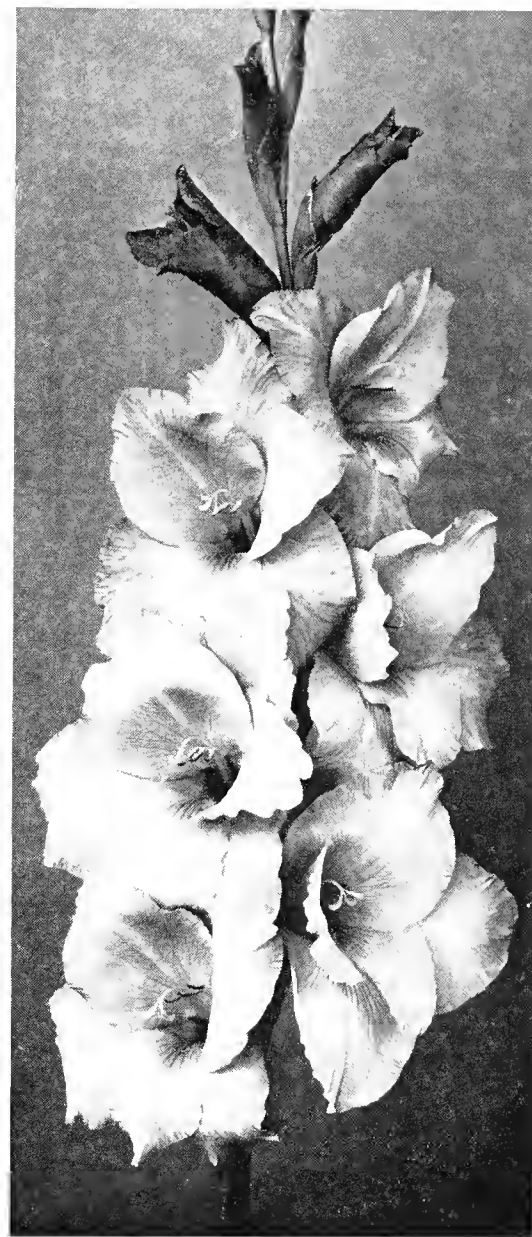

EARLY PEACH (Pruitt). Peach-red blending to ivory in the throat of upper petals. Lower petals blotched a warm buff with stripes and pencils of rose-red. Petals beautifully flaked scarlet. Six or seven wide open florets open at a time. Stem and spike straight and strong. Good bulb-let producer and a splendid germinator. 35c each.

ALL BULBS LISTED IN THIS FOLDER ARE MAILED POSTPAID

NEW ERA

PICARDY

WE DESCRIBE A FEW OF THE VARIETIES OFFERED

AMADOR (Kingsley). Has not only won blue ribbons at major shows up and down the country, every year since introduction, but also an Award of Merit from the British Gladiolus Society of England. The form of the flower is good, the placement is perfect, the stem is strong without clumsiness and the color is about as bright as it can be without being harsh. A red that does not turn black at the edges and keeps its sparkling qualities under electric lights.

AVE MARIA (Pf.) Large flowering. Light blue with small purple blotches. Seven or eight blooms open at one time. Excellent facing and remarkably good spike.

BLEEDING HEART (Brown). White, tinted light pink with large red blotch. Good propagator. Fine commercial. Excellent shipper.

BLUE ADMIRAL (Christ). Deep violet blue with violet plume. Of the more moderate priced varieties, this is perhaps the best dark "blue". Very vigorous in growth with tall spikes having about six 5-inch florets of good texture open. In color not as blue as Pelegrina but more attractive to some people. Good propagator.

COMMANDER KOEHL (Pfitzer). Color, vivid scarlet red without markings or blotches. Individual florets $6\frac{1}{2}$ inches across of which there are 6-7 open at a time, producing a flower spike measuring 24 inches from top to first floret. The vivid color, large florets of heavy substance combined with long flower head, places Commander Koehl as a leader in its color class.

MILDRED LOUISE (Wentworth). Light salmon pink with a lighter throat and darker penciling on the lower petals. Very popular and wonderful cut flower.

MINUET (Coleman). Wonderful clear lavender which is still the measuring stick for all lavenders. Fine sturdy grower and one of the best glads of all times.

NEW ERA (Ellis-Majeski). Eosine pink blended with La France pink. A pink that is PINK. We believe it to be the finest color of any Glad yet introduced. Soft cream throat, white midribs. Extremely ruffled (very frilled), 10 open florets, 18 florets and buds. Good placement and always straight. Heavy texture. Under subdued light it has no equal. At Ohio State Glad Show it was awarded first for best seedling, also first for best ruffled variety. At the N. E. G. S. Show it was awarded first in the Med. Dec. Class.

MINUET

COMMANDER KOEHL

THIS SEASON SEE PRICES ON NEXT PAGE

MOTHER MACHREE (Stevens). Difficult to describe. A greyish lavender with flashes of salmon pink and a touch of gold in the throat. Some of the colors one sees in a beautiful sunset. A smoky that is as good today as it was when it sold for \$100.00 a bulb, only a few years ago.

PELEGRINA (Pfitzer). A pure dark violet blue, lower petals somewhat darker. Stands excessive heat as do few other varieties. When the first floret opens, nearly all the 16-18 buds are showing color. This makes the spike with its perfectly faced flowers very attractive. There are 6-8 florets open at a time. A good grower and a splendid propagator. Every one who grows glads should have it.

PICARDY (Palmer) is the most spectacular pink of the last few years. The very large flowers of wonderful form, the warmth of the coloring, the tall spikes on which the flowers are ideally spaced, all combine to make Picardy the glad of indescribable charm. It has more winnings to its credit than any other glad of recent introduction.

PARADISE (Pruitt). Clear apricot, opening 6-7 large florets at a time. Tall, straight spikes with perfect placement. Robust grower, heavy producer, germinates well. A good commercial. Early.

SOLVEIG (Prestgard). New tall white of unusually heavy substance. Its beautifully ruffled florets of heavy white velvet hold up under intensive heat better than any other gladiolus we have ever grown. Spikes come straight under all weather conditions and the placement of the 5 or 6 wide open flat florets, measuring 6½ inches, is as perfect as could be desired. One of but two seedlings awarded the **FIRST CLASS CERTIFICATE** of the American Gladiolus Society in the last 16 years.

WASAGA (Palmer). A clear capucine buff without throat markings or flecking. Straight spike of medium height. Five wide open, waved and well ruffled blooms open at one time. With the exception of Solveig this is the only variety to receive a first class certificate in the seedling class of the American Gladiolus Society since 1916.

WUERTEMBERGIA (Pritzer). Very tall spikes of large scarlet flowers with cream and white throat blotches. One of the most popular in our gardens and will be in demand as a cut flower.

1937 Prepaid Trade List of Pruitt's Oregon Grown Gladiolus

Prices per 100 unless otherwise stated; 25 bulbs at the 100 price. All bulbs true to name and gas treated under supervision of state inspector.
